

## Mechanical C.E.T.

MNE Engineering is a team of Mechanical and Electrical Engineers that provide professional design services to private and public sector clients in the building construction industry.

Based in Kitchener since 1993, MNE's engineering services include conceptual (schematic) design, technical (detailed) design, specification tendering and contract administration for building construction projects. MNE's scope of systems design includes HVAC, plumbing, fire protection, power distribution, lighting, life safety, communications, IT and security.

We emphasize functional, cost-effective, sustainable designs that meet budgetary requirements and energy demands.

### Position Description:

We are currently seeking a full time Mechanical - Certified Engineering Technologist to join our team.

### Duties and Responsibilities:

- Design of various mechanical systems for residential, commercial, institutional and industrial facilities.
- Review and understand relevant Codes and Standards, design calculations and project documentation.
- Prepare drawings, schematics and reports.
- Provide technical and administrative support through all phases of the project.
- Perform field reviews and participate in construction site meetings.
- Work with project team to ensure timely project completion.

### Qualifications:

- College Diploma/Designation for Mechanical Engineering Technology.
- Experience with AutoCAD and Revit/BIM software.
- A proven ability to handle sensitive client issues with strong problem-solving skills.
- Excellent written and verbal communication skills.
- Ability to take initiative and work with minimal supervision.
- Team player consistently able to meet deadlines, with a strong ability to prioritize.
- Maintain a valid Ontario driver's license.
